

INTERNATIONAL CONGRESS ON DRUG THERAPY IN HIV INFECTION

GLASGOW SCOTLAND

The first International Congress on Drug Therapy in HIV Infection will take place at the Scottish Exhibition and Conference Centre, Glasgow, Scotland on 9–12 November, 1992.

The Congress is co-sponsored by the University of California School of Medicine, San Francisco, Karolinska Institutet, Stockholm and University College and Middlesex School of Medicine, London.

The focus of the Congress will be the key clinical issues in the treatment of HIV, allowing clinicians and clinical scientists to participate in active debate. Acknowledged international experts will present keynote review lectures, followed by oral and poster presentations selected from submitted abstracts in the following areas:

- Virological/Immunological Therapy Monitoring
- Early Intervention
- Clinical Trial Design
- Combination Therapy
- Opportunistic Infections
- Pharmacology
- Tumours
- Treatment of HIV in the Developing World
- Paediatrics
- New Antivirals Phase I/II
- Vaccine and Immunotherapy including Cytokines and HGFs

Deadline for Abstracts – 7 August 1992

Deadline for Registration – 25 October 1992

For further details, abstract forms, or industry sponsorship opportunities including Satellite Symposia, Workshops, Exhibitions, and Advertising, please contact:

MSSVD

The Medical Society for the Study of Venereal Diseases

President: Dr J R W Harris

St Mary's Hospital, London W2 1NY

The object of the Society is to bring together those interested or engaged in the diagnosis, treatment, and community medical aspects of sexually transmitted diseases. The Society meets regularly in London at the Royal Society of Medicine for the reading of papers, discussions, and presentation of cases. An out-of-London meeting is held in the Spring. Annual subscription for membership of the Society is £50.

Applications for membership are welcome and forms can be obtained from the Honorary Secretary, Dr M J Godley, Florey Unit, Royal Berkshire Hospital, Reading RG1 5AN.

Journal of the Institute of Medical Ethics

EDITOR: **RAANAN GILLON**

is a leading international journal in the field of medical ethics. It publishes interdisciplinary articles on ethical aspects of health care. Contributions to the journal originate in many countries and disciplines, and all undergo rigorous assessment. In addition to publishing original articles it provides a forum for reasoned debate on ethical issues. Case conferences, editorials, book reviews, correspondence and news and notes are also included. Occasional series focus on teaching medical ethics, experiences of medico-moral dilemmas ("At the Coalface") and medical ethics in literature.

- **The reversibility of death**
David Cole with a reply from David Lamb
- **Debate-Involving patients in do not resuscitate decisions**
Erich Loewy
- **Telling the truth**
Jennifer Jackson
- **Literature and medicine**
Robin Downie
- **Cost effectiveness analysis. Is it ethical?**
Alan Williams
- **Paying for health**
Sir Douglas Black

Prescribing information *Indications and dosage:* Systemic candidiasis: 400mg on the first day followed by 200-400mg once daily. Cryptococcosis, including meningitis: 400mg on the first day followed by 200-400mg once daily. Maintenance therapy to prevent relapse of cryptococcal meningitis in patients with AIDS: 100-200mg daily. Oropharyngeal candidiasis: 50-100mg once daily for 7-14 days or longer in immunocompromised patients. Other mucosal candidal infections: 50-100mg once daily for 14-30 days. Vaginal candidiasis: single 150mg dose. Prevention of fungal infections in neutropenic patients following cytotoxic chemotherapy or radiotherapy: 50-100mg once daily whilst patients are predisposed to such infections. Use in the elderly - as above except for those renally impaired - see data sheet. Use in children - not recommended. *Administration:* Diflucan may be administered either orally or by intravenous infusion at a rate of approximately 5-10ml/min. The dosages for the two routes are equivalent. *Contra-indications:* Hypersensitivity to fluconazole or related triazoles, pregnancy and women of childbearing potential unless adequate contraception is employed. *Warnings:* Lactation - not recommended. Renal impairment: dosage reduction may be necessary, see data sheet. *Drug interactions:* Monitor patients on concurrent anticoagulants, oral sulphonylureas, phenytoin or cyclosporin, rifampicin or theophylline. *Side-effects:* Nausea, abdominal discomfort, diarrhoea, flatulence and anaphylaxis. *Package Quantities and Basic NHS cost:* 50mg capsule, calendar pack of 7, £16.61 (PL 57/0289); 200mg capsule, calendar pack of 7, £66.42 (PL 57/0317); 150mg capsule, pack of 1, £7.12 (PL 57/0290); Powder for Oral Suspension, 35ml after reconstitution with water: Bottle of 50mg/5ml, £16.61 (PL 57/0343), Bottle of 200mg/5ml, £66.42 (PL 57/0344); Bottles of 25ml and 100ml containing Diflucan 2mg/ml intravenous infusion - 25ml (50mg) bottle, £7.32; 100ml (200mg) bottle, £29.28 (PL 57/0315). Hospital prices are available on request. *References* 1. Data on file, Pfizer Ltd. 2. Brammer, K.W. (1990), *Haematology and Blood Transfusion*, 33, 546-550. 3. Samonis, G. et al. AWARDED TO CENTRAL RESEARCH
DIVISION OF PFIZER LIMITED

DIFLUCAN* is a highly effective antifungal agent with activity against a wide range of common invasive fungal infections.¹ It should be considered as a first-line treatment in suspected or proven candidal or cryptococcal infections. DIFLUCAN also provides effective prophylactic therapy in neutropenic patients and in patients with solid tumours.^{2,3}

DIFLUCAN has a good safety profile and is well tolerated in both its oral and intravenous forms.⁴ Since DIFLUCAN is generally better tolerated than I.V. amphotericin B, patients require less hospital care and can be treated on an outpatient basis thus facilitating a substantial reduction in costs.⁵

Diflucan* ORAL/I.V. Counters invasive fungal infection.
